

Item	To Australia from Vietnam	From Australia to Vietnam
Covid-19 testing	Passengers aged 5 years and older must hold a negative Covid-19 test result obtained prior to departure. Accepted tests are; - Nucleic acid amplification (NAA) tests, such as a polymerase chain reaction (PCR, RT-PCR) test, transcription mediated amplification, or Loop-mediated isothermal amplification. These tests must be obtained within 3 days prior to departure; or - Rapid antigen tests (RAT). RATs must be obtained within 24 hours prior to departure and come from certified laboratory – self test kits results not acceptable. <i>The test result must also include the following information in English, or in original language along with a certified translation to English:</i> - Passengers' name and date of birth (age at time of test or passport number accepted, if date of birth not listed); - The test result (such as 'negative' or 'not detected'); - The method of test conducted (e.g. PCR test); and - The date and time the respiratory sample was collected.	72 hours prior to ARRIVAL into Vietnam RT-PCR for any passenger over 2 years of age. Test must show travellers full name, date of birth, time and date of test, testing location including facility name, address and phone number, name of person authorised to do the test, type of test to state RT-PCR or Real Time PCR and must show a negative result for Covid-19 infection.

!!!!Travel guideline only and subject to change. For reference only. Please confirm prior to travel for updates!!!!

	<i>Additional information may be requested:</i> 1. The respiratory sample type that was collected (e.g. nasopharyngeal); 2. The date and time the test result was authorised and the name of the laboratory authorising officer; 3. Name and address of the laboratory, clinic or facility that administered the test; and 4. Accreditation body that the laboratory is affiliated with. Some states have additional requirements see extra's below.
