

Atlas Vacancy – MEP Associate Director (Local & Expat)

About us

Atlas is a leading provider of 2D, 3D and BIM documentation and project delivery services to architectural, engineering and construction professionals. Since 1998 we have delivered quality documentation and data models using all major CAD and BIM platforms, giving our clients more time to manage the design process. All our project work and services are supervised by experienced British and Australian architectural and engineering professionals based at our operations centre, making it possible for us to provide a high performance service to our clients at all times.
